Sona College of Technology has achieved global identity through its involvement in research in recent technologies and successful completion of projects and products. The college is known for its rich tradition and high values bestowed upon it by its Founder Chairman, Thiru. M.S. Chockalingam. The "AICTE – CII Award for Best Industry – Linked Technical Institute in India – 2013 & 2015" was bestowed on Sona among several short-listed institutions. The college stands testimony to the commitment of high quality education. It is yet another milestone in the success story of the institute. Sona College of Technology is equipped with world class infrastructure, highly qualified and experienced faculty members. An active Placement Training and Welfare Cell function with the sole aim of placing the students in top-notch companies. In short, Sona stands tall as one of the best destinations for world class education.

The CSE Department was incepted with the vision of creating the most conducive environment for quality academic and research education. The department also produced many high quality publications in Journals with impact factors and quality conferences at national and international level. The department has an approved Research Centre under Anna University, Chennai and has strong industry institute partnership. The department has two PG programs and a UG program.

The IT Department demonstrating high professionalism puts the graduating engineers on excellence steroid in preparation for the performance needed to navigate among the opportunities abounding in today's world of internet and e-revolution. The department offers B.Tech(IT) and M.Tech(IT). This department is having good interaction with many industries such as IBM, CISCO and INFOSYS.

Recently CSE & IT department has bagged the AICTE-CII survey award for Best Industry-Linked Institute in India 2013.

Latest surveys and news reports indicate that the world will continue to see a serious shortage of software professionals for the foreseeable future. So, computer programming is expected to be a high-paying & marketable skill for years to come. Even if you decide to pursue a career in another field, it is very likely that you will use a computer on the job! Basic programming skills can enable you to be more efficient in your job & try something new!! Almost every one can learn to program if they are willing to think and try. Yet, we see significant % of engineering students making career choices, without knowing the meaning of the term "computer programming!" Ok, how can you assess your interest level? How to check whether you have the mindset to enjoy programming? There is one simple way to find out – Jump in there, write a few programs and see for yourself! We are passionate about programming & problem solving techniques! We strongly believe that it is possible to introduce Computer Programming to all students in an enjoyable way and enable them to consider higher education & career in STEM fields.

**Who Can apply** Any Faculty / Industry members interested in programming.

## Organizing Committee

### Chief Patrons
